Education

Bachelor of Technology, Computer Science Engineering,   2019 – 2023
Ujjain Engineering College

12th Maths, *Maa Barfani School*   2018 – 2019

10th, *Ebenezer Senior Secondary School*   2017

Skills

Programming Languages
Java, JavaScript

Web Technologies
ReactJS, JavaScript, ReactNative, HTML, CSS , Bootstrap, Api's,Git and Github,Redux

Programming concepts
OOPS in java, Data Structures and Algorithms, Database Management Systems

Projects

GOFOOD, *MongoDB,Express,Reactjs,NodeJS,Bootstrap,MaterialUI*
- GoFood is a a robust and scalable food delivery application developed using the **MERN stack** which provides a convenient platform for customers to browse a wide range of food items.
- Implemented end-to-end functionalities, including user authentication, menu management, efficient data management using MongoDB, CRUD operations , API management, password encryption and much more, GoFood guarantees a seamless and user-friendly experience for customers.

FEE MANAGEMENT SOFTWARE, *Reactjs,Django,RestAPI,MongoDB,HTML,CSS,JavaScript*
- It is a desktop application that helps coaching institutes to manage their entire operations and handle the database of students year-wise.
- As a freelance team member, I was responsible for managing the front-end and UI/UX side of the project...
- Worked on all the CRUD operations performed in the project and gained knowledge of how the frontend, backend, and database interact in a software application.

COVID CASES TRACKER, *Reactjs , Api's , Bootstrap,Axios*
- Developed a website that fetches live data of COVID-19 cases from an API provided by the government of India and displays it based on different parameters.
- Worked on the front-end using react to implement features such as user interface, navigation, and data visualization.

NEWS APP, *React Native , Axios Library, Api*
- Developed a mobile application using react native that enables users to access daily news within different categories in a concise format with visuals, optimizing their time and enhancing their user experience.
- Utilized the axios library of react native to fetch live data from an API.
- Created an intuitive user interface that simplifies navigation, enhances accessibility, and ensures that users can easily browse and consume news based on their interests.

Awards

- Solved **300+** data structures and algorithms problems on gfg and leetcode.

- National-level chess player.
